---

## PROFESSIONAL SUMMARY

Linux & AWS Cloud Engineer with hands-on experience in Linux System Administration, AWS Cloud services, and production support. Skilled in user and permission management, shell scripting, package management, process monitoring, networking fundamentals, EC2 deployment, IAM, VPC, and S3. Experienced in troubleshooting Linux servers and deploying applications on AWS. Passionate about Cloud Infrastructure, Automation, and DevOps.

## TECHNICAL SKILLS

**Operating Systems:** Linux (Amazon Linux, Ubuntu), Windows Server

**Linux Administration:** User & Group Management, File Permissions, ACL, Process Management, Cron Jobs, Shell Scripting, Package Management (YUM, RPM, APT), LVM, File System Management, System Monitoring

**Cloud (AWS):** EC2, IAM, S3, Route 53, VPC, Route Tables, CloudWatch, Security Groups, Load Balancer, RDS

**Networking:** TCP/IP, DNS, DHCP, VPN, Subnets, CIDR

**Version Control & Database:** Git, GitHub, MySQL

## PROFESSIONAL EXPERIENCE

**Associate Software Engineer – Cloud & Technical Support**

**Oct 2025 - May 2026**

*Kavya Infoweb Private limited | Nagpur, Maharashtra*

- Created and managed **Users, Groups, and File Permissions**.
- Performed package installation using **YUM, RPM, and APT**.
- Developed **Shell Scripts** for automating routine Linux administrative tasks.
- Scheduled tasks using **Crontab** for automation.
- Performed backup and restore operations.
- Provisioned and configured **AWS EC2** instances for application deployment and testing.
- Managed Linux **File Systems, Ownership, Permissions and Access Control**.

**React Software Developer (with Cloud Exposure)**

**Jun 2023 - Oct 2025**

*SSDIT Solutions | Nashik, Maharashtra*

- Deployed and maintained web applications on **AWS EC2** and **S3** with **automated CI/CD** integration
- Administered Linux-based servers (Amazon Linux, Ubuntu) for application deployment, debugging, and performance tuning
- Developed responsive UI components using React.js, JavaScript, HTML5, CSS3, Bootstrap, and Tailwind CSS

## PROJECTS

**AWS Three-Tier Infrastructure Deployment**

- Designed and deployed a secure **Three-Tier Architecture** on AWS using **VPC, Public & Private Subnets, EC2, Internet Gateway, and Route Tables**.
- Configured **Security Groups, IAM, and Application Load Balancer (ALB)** to ensure secure access, traffic distribution, and high availability.
- Deployed **Amazon RDS** in a private subnet and utilized **Amazon S3** for backup and storage management.
- Performed Linux server deployment, monitoring, and troubleshooting, ensuring a secure and scalable cloud infrastructure.

**React Application Deployed on Cloud**

- Developed a React application and deployed it on **AWS EC2 running Amazon Linux**. Configured Nginx for hosting and integrated **GitHub-based CI/CD** for automated deployment.
- **Implemented CI/CD pipeline** for automated build, testing and development

## EDUCATION

**BE in Computer Science Engineering**

**2019 – 2022**

Savitribai Phule Pune University | CGPA 8.96

Nashik

## CERTIFICATION

AWS Certified Solutions Architect – Associate (*In Progress*)
